

Specializing in web-based integrated building management systems including temperature control, lighting control, card access, CCTV, and digital video management solutions, IES is committed to your long-term satisfaction.

Company Profile

Founded in 2002, *Innovative Energy Solutions, LLC*, (IES) is an engineering and service company specializing in complete building solutions for the control of mechanical and electrical systems in commercial and industrial buildings. The company is incorporated in Ohio and conducts business in Ohio, Kentucky, and Indiana.

IES currently employs over 35 trained and certified professionals with a mix of sales, engineering, technical and administrative staff.

IES was formed by the acquisition of the Cincinnati branch office of *Invensys Building Systems*, a local controls leader for well over 30 years. IES has aligned itself with world-class suppliers of building products and currently represents and services several brands including: TAC, Schneider Electric, Invensys, Siebe Environmental Controls, Robertshaw, Barber-Colman Company, Square D PowerLogic® and PowerLink®, Andover Continuum® Card Access, and Pelco Digital Video Systems. Our talented local staff has over 350 years of building control and management

IES specializes in web-based integrated building management systems including temperature control, lighting control, card access, CCTV, and digital video management solutions. We offer complete engineering, installation and service support for each of these integral building functions. IES is a market leader in third-party systems integrations using open protocol and information technology (IT) solutions.

IES offers a variety of energy management services including energy audits, energy justified retrofits, utility analysis, measurement, and verification. We also provide complete HVAC mechanical and emergency repair services. IES strives to provide our customers with the tools and solutions that allow them to effectively manage, control, and maintain their building environment while improving staff efficiencies and reducing overall energy cost.

experience and brings a wealth of knowledge; providing great benefits and unmatched value to our customers.

IES understands the planning and multi-discipline coordination required to ensure that projects proceed smoothly and according to schedule. Our dedication to quality engineering and service, along with a pro-active approach to project coordination with other involved disciplines, helps to ensure successful projects for construction management teams.

IES is a member of the *Independent Representative Council*, a large network of TAC/Schneider independent field offices across the USA. This partner network provides a vehicle of shared best practices and support that enables IES to provide the best products, services, and solutions for our customers.
